

Exploring Our Commercial Medical Cannabis Strains: A Comprehensive Overview

Felix Varenne

felix.varenne@bioleafhealth.com

Introduction: Who We Are and Our Mission

Welcome to our comprehensive overview of our commercial medical cannabis strains. In this presentation, we will introduce our company and share our mission with you.

Established in 2021 in the Alentejo region of Portugal, our goal is to produce the best quality organic Indoor & Sungrown Medicinal Cannabis while respecting the environment, the people, and the final consumer.

We develop tailored Cultivars for specific pathologies such as chronic pain, stress, anxiety, lack of appetite, depression, nausea, insomnia and neurodegenerative disease. As well as improve health and wellness for patients who suffer from Cancer, Parkinsons, Alzheimer's and Epilepsy.

Our Company's Commitment to Quality and Innovation

Commitment to Quality

At our company, we are dedicated to ensuring the highest standards of quality in all our commercial medical cannabis strains. We prioritize quality control measures at every stage of production to deliver products that meet the needs and expectations of our customers.

100% Organic

We make use of fertilisers, substrate and IPM (Integrated Pest Management) as we choose to rely exclusively on natural beneficial insects (dragonflies, birds, ladybirds) rather than to use phytopharmaceuticals products.

Customer Satisfaction

Customer satisfaction is our top priority. We strive to exceed expectations and provide our customers with exceptional experiences through our high-quality and innovative commercial medical cannabis strains.

The Science Behind Our Selected Commercial Strains

Combining nature and expertise

1) Research and Development

Our team of scientists and growers extensively study and analyze various cannabis strains to identify those with superior medical properties. Through rigorous testing and evaluation, we select strains that offer optimal benefits and effects.

2) Botanical Expertise

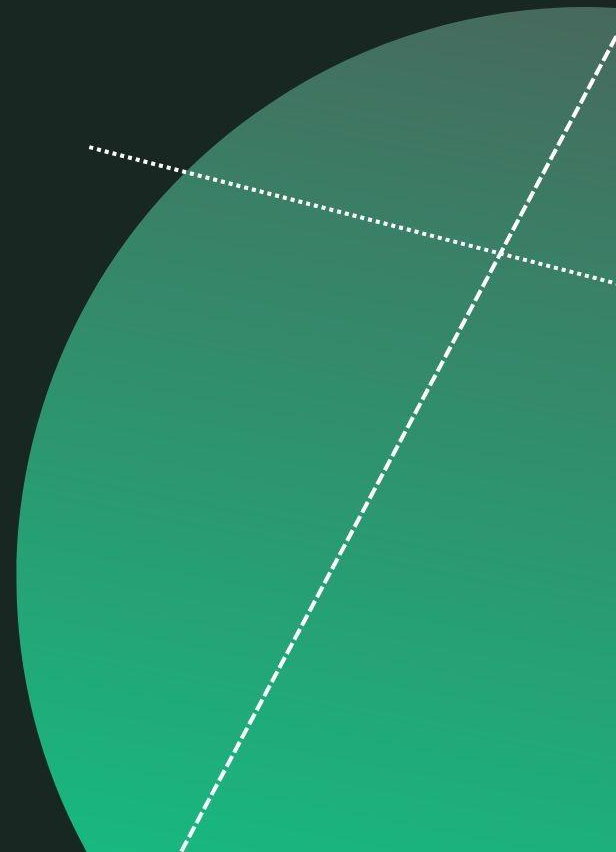

Drawing on our deep understanding of botany, we carefully breed and cultivate our selected strains to ensure consistency, potency, and quality. Our cultivation methods leverage the power of nature combined with advanced techniques to produce outstanding commercial medical cannabis strains.

3) Pharmaceutical Standards

Applying pharmaceutical standards, we adhere to strict protocols in the cultivation, processing, and production of our commercial medical cannabis strains. This ensures that our products meet the highest quality and safety standards for medical use.

Understanding the Medical Benefits of Our Strains

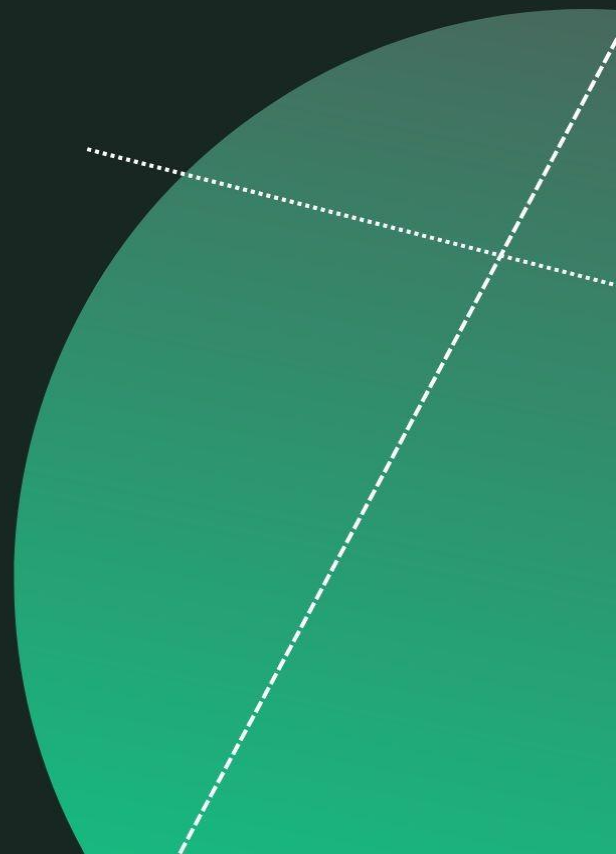

Our commercial medical cannabis strains offer a range of therapeutic benefits. Through extensive research and testing, we have identified their potential to alleviate symptoms and improve the overall well-being of patients. By understanding the medical benefits of our strains, you can make informed decisions and recommend the most suitable strains to your patients.

Product Line: Varieties, Potency, and Effects

Ensuring a personalized experience

Varieties

Our product line offers a wide variety of cannabis strains, each with its distinct characteristics, flavors, and aromas. From soothing indicas to energizing sativas, we cater to the diverse needs and preferences of our customers.

Potency

To meet different potency requirements, our commercial medical cannabis strains are available in various strengths. Whether your patients require mild or high potency strains, our product line has the right options to address their needs.

Effects

Our strains offer a range of effects, such as pain relief, relaxation, mood enhancement, and increased focus. By understanding the specific effects of each strain, you can suggest the most suitable options to your patients for their desired therapeutic outcomes.

Product Line: Dried Flower, Grow-on-demand, Biomass and Extracts

Grow-on-demand

Select one of our cultivars or one of yours and we'll grow it and have it ready to be shipped in 3 months to GACP or EU-GMP specifications.

Extracts

We also offer a range of APIs such as full spectrum and THC distillates through our extraction partners.

Biomass

Select a cultivar for outdoor sungrown production and we'll send you GACP flower ready for extraction

Excellence in Cultivation and Quality Control

From seed to sale

1 Cultivation Process

We employ a meticulous cultivation process that begins with carefully selected seeds and ends with the harvest of premium-grade cannabis plants. Our cultivation techniques prioritize sustainability and optimal plant health.

2 Quality Control

At every step of the production process, our team conducts rigorous quality control checks to ensure that our commercial medical cannabis strains meet the highest industry standards. From cultivation to packaging, quality is our top priority.

3 Traceability and Transparency

We maintain a comprehensive traceability system to track and document the journey of our commercial medical cannabis strains from cultivation to distribution. This ensures transparency and accountability in our operations, giving you peace of mind.

Regulatory Certifications

We are currently GACP certified and undergoing EU-GMP certification
Through post-processing partnerships our greenhouse production is **EU-GMP certified**.

Thank You
